

## IN THE CLAIMS

1 (Currently Amended). A display comprising:

- a first electrode formed of a metallic material;
- a second electrode of a transparent material;
- a light emitting material between said first and second electrodes; and
- a fuse between said first electrode and said light emitting material.

2 (Original). The display of claim 1 wherein said first electrode is a row electrode.

3 (Original). The display of claim 2 wherein said second electrode is a column electrode.

4 (Currently Amended). The display of claim 1 wherein said first and second electrodes ~~is a transparent electrode and said first and second electrodes~~ are deposited on a transparent sheet.

5 (Original). The display of claim 1 wherein said light emitting material is an organic light emitting material.

6 (Original). The display of claim 1 wherein said fuse is formed integrally with said first electrode.

7 (Original). The display of claim 6 wherein said fuse is formed as a reduced width section of said first electrode.

8 (Original). The display of claim 7 wherein said fuse extends transversely from said first electrode.

9 (Original). The display of claim 8 wherein said fuse includes a contact that contacts said light emitting material, said fuse including a fusible element between said contact and said first electrode.

10 (Original). The display of claim 9 wherein said fuse is formed of a material that fails by electron migration when the current density through said fuse exceeds a limit

Claims 11-17 (Canceled).

18 (Original). A display comprising:

a substantially transparent electrode;

a substantially non-transparent electrode extending generally transversely to said transparent electrode;

an organic light emitting material between said transparent and non-transparent electrodes; and

a fuse between said non-transparent electrode and said organic light emitting material.

19 (Original). The display of claim 18 wherein said transparent electrode is a column electrode and said non-transparent electrode is a row electrode.

20 (Original). The display of claim 18 wherein said fuse is integral with said non-transparent electrode.

21 (Original). The display of claim 18 wherein said fuse is a reduced width section of said non-transparent electrode.

22 (Original). The display of claim 18 wherein said fuse extends generally transversely to said non-transparent electrode.

23 (Original). The display of claim 18 wherein said fuse is formed of a material that fails by electron migration when the current density through said fuse exceeds a limit.

24 (Original). The display of claim 23 wherein said fuse is formed of the same material as said non-transparent electrode.

25 (Original). The display of claim 18 wherein said fuse includes a contact that contacts said organic light emitting material, said fuse including a fusible element between said contact and said non-transparent electrode.
